

Environmental protection

SSC Baltic Wind Sp. z o.o. conducting statutory activities, put great attention to aspects related to environmental protection. The main purpose of SSC Baltic Wind sp. z o.o. is to provide our clients with the highest quality services. The implementation of the assumed goal is associated with the continuous development of our company in a sustainable manner, respecting the environmental conditions set by law and maintaining the principles of social responsibility.

We realize that minimizing negative impact on the natural environment brings us benefits, including: acceptance of the company's functioning in the local community, raising the reputation among customers, minimizing the costs of the company's operations, and raising the employees' environmental motivation and awareness.

By approaching the issue of environmental protection in a comprehensive manner, we have implemented the Environmental Management System in accordance with the requirements of the PN-EN ISO 14001: 2015 standard. We have established an environmental policy that defines the framework for the company's environmental goals and objectives.

Activities related to environmental protection are aimed primarily at reducing the consumption of utilities and rational management of waste generated mainly at the company's headquarters as well as on projects being carried out.

We declare full compliance with environmental laws and requirements of our clients.

If you have any questions or comments to our environmental activities, please contact us by email: info@ssc-balticwind.com
